

Afghanistan Water Polo at a Glance

Afghanistan Water Polo is dedicated to the development and promotion of a successful national water polo program in Afghanistan, inspiring growth and the pursuit of domestic and international excellence.

The Afghanistan Water Polo was created to develop and promote water polo, the oldest team sport in the modern Olympics, in a country where sports take a distant place behind the realities of war. Sanctioned by the Afghanistan National Olympic Committee, Afghanistan Water Polo is busy developing quality programs to establish Afghanistan's presence on the international stage.

Our Vision

Through creation of local, provincial and national team programs, our organization will provide opportunities for the people of Afghanistan to learn, grow, and compete. The historical significance is overwhelming, considering that our efforts can help stabilize a volatile region of the world, bring hope to a nation and promote "peace through sport."

1. To inspire the growth and the pursuit of domestic and international excellence in the sport of water polo for the people of Afghanistan. This will be accomplished through:

- Developing and coordinating national and provincial level programs and competitions for athletes, coaches, officials and aquatics organizations;
- Participating in regional and international competitions to encourage positive international relationships;
- Creating and delivering quality programs for all levels, beginning to advanced;
- Encouraging the continuing development of athletes, coaches, officials and an enthusiastic fan base;
- Providing opportunities for Afghan people of all ages and ability to participate in the Olympic sport of water polo.

2. To combat terrorism at a fundamental level by helping the children of Afghanistan grow up as healthy, educated and committed members of the international community.

The Opportunity of a Lifetime

The real value in our efforts is in the difference it will make to a country and its people. By giving Afghans, many of whom have never traveled outside their home provinces, an opportunity to experience other nations and cultures, it will provide hope that their country's re-emergence into the international community is a step closer for this and future generations of the people of Afghanistan.
